(2) Does providing access to network elements other than access to vertical features of unbundled switches implicate intellectual property rights of equipment vendors or other third parties? Why or why not? (3) Does providing access to services for resale, in accordance with section 251, implicate intellectual property rights of equipment vendors or other third parties? Why or why not? (4) What are the potential burdens on requesting telecommunications carriers if they are required to independently negotiate licensing agreements with equipment vendors or other third parties before obtaining access to unbundled network elements? Are there ways to eliminate or reduce those burdens on requesting telecommunications carriers? In addition, we encourage parties to comment on MCI's proposal that incumbent LECs bear the burden of negotiating any extension or augmentation of intellectual property rights that might be implicated in interconnection agreements.
